<b>SECTION 4 + FIRST AID MEASURES</b>							
<b>EYES:</b> Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower lids. If irritation exists get Medical Aid							
<b>SKIN:</b> Get medical aid if irritation persists. Immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical aid if irritation develops or persists.							
<b>INGESTION:</b> Get medical aid if irritation or symptoms occur.							
<b>INHALATION:</b> Remove from exposure to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid if cough or other symptoms appear							
NOTE TO PHYSICIAN: TREAT SYMPTOMATICALLY AND SUPPORTIVELY

<b>SECTION 11 ☠ TOXICOLOGICAL INFORMATION</b>				
<b>OIL MIST TOXICITY</b>				
Oil mists can cause irritation. The 5 mg/M <sup>3</sup> level would seem to offer adequate protection for these oils since most are probably less toxic, unless they have additives present that have unique toxic effects. It should also be noted that oil has the ability to cause dermatitis and it is important to prevent prolonged skin contact with the liquids or mists.
